

5. Data Visualization II

1. Use the inbuilt dataset 'titanic' as used in the above problem. Plot a box plot for distribution of age with respect to each gender along with the information about whether they survived or not. (Column names: 'sex' and 'age')

In [1]:

```
import pandas as pd
import seaborn as sns
```

In [2]:

```
ds = pd.read_csv( "titanic.csv" )
ds.head()
```
